b. How many children are girls in Year 5?

c. There are more girls in Year 5 than Year 6. True or False? Use a calculation to prove your answer.

I can solve problems involving the calculation of percentages in pie charts.

Favourite Zoo Animals

	crocodile		tiger		monkey		elephant		kangaroo
--	-----------	--	-------	--	--------	--	----------	--	----------

- 1. 200 people were asked about their favourite zoo animal. Use this information to answer these questions about the pie chart:
- a. How many people like elephants?
 - b. How many more people liked tigers than kangaroos?

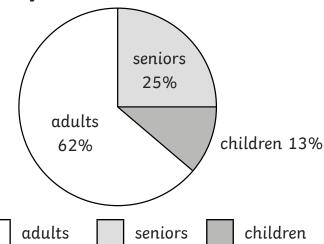

c. 14 more people liked monkeys than tigers. True or False? Show a calculation to show how you know.

The Make-up of an Audience at an Afternoon Performance at a Theatre

The Make-up of an Audience at an Evening Performance at a Theatre

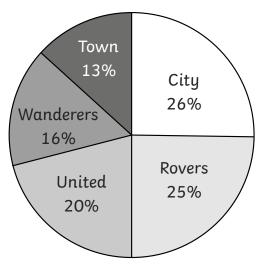

2. 200 people went to the theatre one afternoon. The same evening, 500 people went to the same theatre. Answer the following questions about the pie chart:

α.	How many adults went to the theatre in the afternoon?
b.	How many children went to the theatre in the evening?
b.	How many children went to the theatre in the evening?

c. The same number of seniors went to the theatre in the afternoon as the evening. True or False? Use a calculation to show how you know.

I can solve problems involving the calculation of percentages in pie charts.

Average Attendance at Football Grounds

City	Rovers	United		Wanderers		Town
------	--------	--------	--	-----------	--	------

1. This pie chart shows the average attendance over a season. Rovers' average attendance was 50 000. Answer these questions about the pie chart:

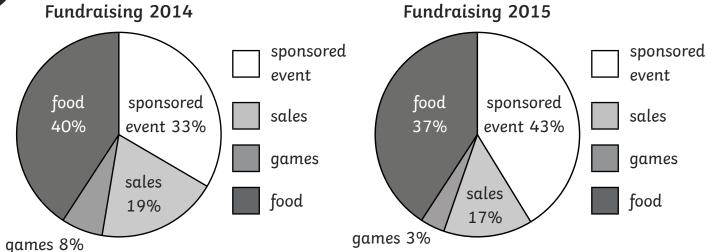

α.	Trovi mang people on average attentaea ont	ou.	

b. How many teams had average attendance over 45 000?

How many people on average attended United?

c. City had an average attendance of more than 50 000. True or False? Use a calculation to show how you know.

Percentages and Pie Charts

2. A charity raises money. In 2014, £1000 was raised. They raised £300 more in 2015. Use this information and the pie charts to answer the following questions:

α.	In 2014, how much money was raised on food?
b.	How much more money was raised in 2015 on sponsored events than in 2014?
c.	More money was raised on sales in 2014 than 2015. True or False? Use a calculation to show how you know.

Percentages and Pie Charts **Answers**

Question	Answer					
	1. 50 people were asked about their favourite ice cream flavour. Use this information to answer these questions about the pie chart:					
α	20					
b	2					
С	True. Children include an example of how they calculated the answer.					
•	2. These pie charts show the number of boys and girls in a school in Year 5 and Year 6. There are 50 children in Year 5 and 60 children in Year 6.					
α	30 boys					
b	27 girls					
С	False. Children include an example of how they calculated the answer.					

Percentages and Pie Charts **Answers**

Question	Answer					
•	1. 200 people were asked about their favourite zoo animal. Use this information to answer these questions about the pie chart:					
α	34 people					
b	14 people					
С	True. Children include an example of how they calculated the answer.					
2. 200 people went to the theatre one afternoon. The same evening, 500 people went to the sar theatre. Answer the following questions about the pie chart:						
α	30 adults					
b	65 children					
С	False. Children include an example of how they calculated the answer.					

Percentages and Pie Charts **Answers**

Question	Answer					
•	1. This pie chart shows the average attendance over a season. Rovers' average attendance was 50 000. Answer these questions about the pie chart:					
α	a 40 000 people					
b	Тwo Teams					
С	True. Children include an example of how they calculated the answer.					
2. A charity raises money. In 2014, £1000 was raised. They raised £300 more in 2015. Use the information and the pie charts to answer the following questions:						
α	£400					
b	£229					
С	False. Children include an example of how they calculated the answer.
